

HIGH CLEARANCE SUPER DUTY UNIVERSAL MOBILE BASE

Getting from Point A to Point B shouldn't be a problem in your woodworking space. Make it easy to move machines and other heavy items over cracks, cords, and uneven terrain with the **BORA-PM-3800** High-Clearance Mobile Base.

If you're always rolling your machines across the shop to use them or store them away, you know how frustrating it can be when a cord gets in the way or you have to lift the machine over a crack. The **BORA-PM-3800** High-Clearance Mobile Base features larger wheels and a higher base to make sure uneven terrain and small obstacles don't slow you down. This is the easiest way to get true, uninhibited workshop mobility.

KEY FEATURES

- 32 mm clearance off the floor—**25% more than standard mobile bases**
