## WOODWORKING SHARPENING ACCESSORY KIT

### Instructions for use

#### Woodworkers' Square Guide (WPESQW)

The square guide raises the tool away from the tool platform. Using a set square or triangle adjust the bar to ensure a perfectly accurate position for sharpening all your chisels and plane blades.

#### Woodworkers' Square Guide

Used in conjunction with the very fine abrasive sharpening belts, the Woodworkers Square Guide will give a perfect cutting edge on any woodworking chisel and plane blade.

The Angle Setter has all the recommended bevel angles, depending on the wood being used, for woodworking chisels such as bevel edge, paring and framing chisels.

Ensure that the desired sharpening belt is fitted, the angle setter is set to the required angle and tighten the locking bolt.

Check that the slot in the tool rest is clean and place the key of the straight edge jig into it. Switch on the **ProEdge** and carefully place the tool to be sharpened against the guide bar of the jig.

Hold the blade against the jig and carefully push the tool forward until the bevel makes contact with the sharpening belt. A slight side to side motion can be used.

#### Aluminium Oxide Belt (WPE240A) x1 240 grit

Perfect for high Carbon steel tools such as woodworking and carving chisels.

240 grit

#### Trizact Belts

(WPE600T) x1 600 grit  
(WPE1200T) x1 1200 grit  
(WPE3000T) x1 3000 grit

Perfect for producing a polished bevel and fine cutting edge on Carbon steel tools

600 grit

1200 grit

3000 grit

#### Abrasive Belts

- Aluminium Oxide Belt - 240 grit
- Trizact Belts - 600, 1200 & 3000 grit

We have selected these belts because they use an even cut rate and give a vastly prolonged belt life over standard abrasive belts. This produces knives and tools with consistent honed bevels and incredibly sharp cutting edges.

As with all abrasives, the belts should always be used in the order of grit from the coarsest to the finest. This is to maximise the efficiency of each belt and to achieve the best possible results.

Other belts are available.

For more details on additional accessories as well as replacement and additional sharpening belts, contact your local stockist or Robert Sorby.
